- Birthday Party Activity Theme Descriptions

Slime

Get Slimed! A Playzeum Party Host will assist children in making their own slime. Children explore suspension properties in solids and liquids with their slime. Then have gooey fun using various loose parts to make creations. Take home containers and instructions will be provided.

Mad Science

Mad Science activities, facilitated by a Playzeum Party Host allow children to experiment using test tubes, mix ingredients to predict results and make their own "potions". Children will keep their invention and test tube and receive instructions to take home .

Prince/Princess

The Prince/Princess party activity will provide materials for party goers to make crowns and wands and other take home props. The royal treatment will be the order of the day!

Fairy

Party Fairies, Elves and Sprites take flight in magical fantasy play when they make Pixie Dust Pendants, conjure up a magical wand, and weave a floral head wreath. Playzeum Party Hosts will assist children to fill their own special "amulet" with "Pixie Dust" (glitter), design a fairy wand made of ribbons and weave silk flowers and ribbon into a pipe cleaner head wreath.

Box Car Racers

Car racing fans will cheer for this party activity as children decorate a miniature unfinished wooden car or design and build balloon cars based on age of party goers with color and stickers. Young drivers participate in their own box car races or create roads and cities with blocks and play traffic props provided by the Playzeum.

Paint Party

A time to get creative with paint and tapes. Children will design and create a one of a kind canvas using resist method. This process will apply to all ages and gender. The result will be unique art pieces for all the children to take home and post proudly. Every child is an artist.
